WORK EXPERIENCE

NeoSOFT Private Limited

Flutter Developer

Feb 2023 - Present

- Developed multiple Fintech applications utilising Google's Flutter framework
- Contributed to the development and deployment of cross-platform applications (Android, iOS and Web) on the Google Play Store and Apple App Store
- Designed and implemented robust app architectures, managed code effectively, optimised app performance, and ensured secure application development

Searce Cosourcing Services Private Limited

Flutter Developer

Feb 2022 - Feb 2023

- Designed and developed native mobile applications for Android and iOS platforms using Google's Flutter framework and Dart programming language
- Crafted visually appealing and responsive UI/UX components, ensuring pixel-perfect rendering across various devices and screen sizes
- Integrated third-party APIs, SDKs, and services to enhance application functionality and user

EDUCATION

PROJECT

Goal

March 2025

- Developed a sophisticated financial goal application specifically targeted for Ultra High Net Worth Individuals (UHNI).
- Designed and implemented an intuitive user interface, prioritizing ease of use and accessibility.
- Integrated fluid animations to enhance the user experience and create a visually appealing interface.
- Implemented quick action features to streamline key tasks and optimize user efficiency.
- Conducted thorough unit testing to ensure application stability and reliability.
- Delivered the application within stringent deadlines, demonstrating project management and time management skills.
- Focused on providing a high-quality, seamless user experience tailored to the unique needs of UHNI clients.
- Ensured the application met rigorous security and performance standards.

mStock

Apr 2024 - Oct 2024

- Orchestrated User Interface (UI) and Application Programming Interface (API) integrations to streamline user experience and enhance system functionality.
- Executed the implementation of Know Your Customer (KYC) features to ensure compliance with regulatory standards.
- Integrated third-party packages to leverage additional functionalities and improve application performance.
- Spearheaded application optimisation to enhance speed and efficiency, resulting in a 40% increase in overall system performance
- Conducted thorough application optimisation measures to enhance user experience and system efficiency

Bounz Rewards

Mar 2023 - Oct 2023

- Established a fintech loyalty points application catering to users in Dubai.

- Executed the implementation of features such as Firebase Dynamic Links, deep linking, push notifications, live location tracking, app engagement tracking, analytics, and a dynamic UI with integrated games.
- Enabled users to acquire loyalty points through expenditures at Bounz-affiliated stores, contributing to enhanced customer retention and increased app usage

Happierwork

Feb 2022 - Feb 2023

- Human Resources Management System (HRMS) application designed for enterprises to efficiently manage employee data throughout their employment lifecycle, from onboarding to separation.
- Real-time location tracking functionality for on-site visit monitoring and precise timekeeping, including punch-in and punch-out capabilities.
- Geofencing technology to define authorised areas for clocking in and out, ensuring accurate time tracking.
- Dynamic, server-driven user interface that can be customised to meet the specific requirements of individual clients.
- Stream-based state management for efficient data handling and a seamless user experience.
- Intuitive and responsive user interface designed for optimal usability and performance across various devices.

E commerce Template - Clean Hexagonal Architecture

Jan 2024 - Apr 2024

- Created a template for E commerce projects which Utilises hexagonal clean architecture with Melos to ensure loose coupling of dependencies.
- Developer can add or remove any dependency from the project without changing the core code making it maintainable for large projects

Union Talk

Jan 2024

- Resolved vulnerability issues identified by the VAPT team through comprehensive fixes
- Enhanced application security through code obfuscation and protection of sensitive data
- Implemented device root status checks to ensure installation on non-rooted devices
- Secured the application by concealing open window information when the app is in the background stage

Wildfit coach

Apr 2025

- Multi role login and different view/ functionality per role (Nutritionist, coach)
- Create nutrition plans, workout plans, assessments, workout progress tracking and lot more features
- Initiative dashboard showing quick actions and overview in single view
- Audio, video call functionality
- Chat functionality developed from scratch
- Utilized Ai based IDE for development

Wildfit Client app

Apr 2025

- Client app to track their own fitness journey
- Connect smart watch, Google fit, apple HealthKit
- Graphs for showing fitness progress in single view
- audio video call, chat functionality with coach developed from scratch

SkipAgent

Feb 2026

- Property buy sell rent application
- Chat functionality for booking visits
- visit schedule functionality

Panchang

May 2026

- Local panchang application based on pure calculations as per Hindu vedic scripts
- perfectly calculating planets positions at any point of time (past and future)
- Nakshatra, muhurta and lot more calculations
- Hindu timeline showing current brahma's age, manvantara to second level accuracy

Aivoiin

May 2026

- Smart home automation project for complete home automation, scene creation & management, room creation assign device to room and manage, automation triggers, geofencing, firmware development, admin panel and much more
- SAAS product which can control any device in network whether it's Aivoin branded or not
- ecosystem with added devices without any physical connection between them
- on premise, cloud both option
- Top notch security with HMAC-SHA256 , AES-256-GCM encryption

SKILLS

Flutter SDK ●●●●●
Android Development ●●●●●

Firebase ●●●●●
Serverpod ●●●●●

Dart SDK ●●●●●
iOS Development ●●●●●

- Flutter
- Dart
- Android
- Core Java
- Kotlin
- Android SDK
- Android Studio
- Jetpack compose
- iOS
- SwiftUI
- XCode
- BLE (Bluetooth Low energy)
- Firebase
- Serverpod
- Json
- BLOC
- Riverpod
- Provider
- StatefulWidget
- GetX
- Streams
- Payment gateway
- Accessibility
- Third party sdk Integration
- NodeJs
- Python
- Generative AI
- Gemini AI
- Clean Architecture
- Hexagonal Architecture
- MVVM/ MVC / MVP
- websockets
- Agora SDK
- IOT
- Antigravity
- cursor
- Prompt Engineering
